I dont think AR is going to want me to be the company spokesperson on a webcast. I can check if you want to go this way, but be prepared that someone from EPA may have to present.

Yes, I still am holding 10 July and 17 June for this meeting so I am available. Are you available the evening of 10 July, Tom?

The announcement looks good, Chris. I talked with Janis this morning-she called me; she seems relatively comfortable with our approach as long as we can get all of the announcements and such done regarding the meeting. She's still very interested in a recording of our meeting on YouTube or a webcast of some sort.

Thanks!
Lynn

Lynn Keller
Emergency Response Manager
EPA Region 9

I am available on the 10 & 18 July. Lynn, can you do the 10? To be clear, I don't want the city to start dictating what our plans will be for this event. We can concede to this date change only. The text is fine and I'm sending you EPA's logo and short url address separately. I felt rush trying to get the notice in the city newsletter as well. We still have the weekly news blast and their other media outlets offered. We need to meet next week to discuss the outreach schedule etc. J

Christine Brainerd called on my way back to the office. She spoke with the City Manager and they feel that rushing to a June 17 meeting is not in their best interest. She asked if we could delay. I think they were concerned about rushing to get the notice in the Folsom newsletter and

were also concerned about the message in the mailer. They want some time to review the mailer and thought it was already in production. Christine was relieved that it had not gone to publishing yet. She stated she would get back to me Monday.

I mentioned that we had a fall back date of July 10 or July 18, but could probably not wait until August. Since City of Folsom mailer goes out bimonthly (June/July and August/September), we would not be able to use this tool to announce the meeting.

I think the announcement could be very innocuous, something like:

**Community Workshop
Aerojet Area 40 Cleanup
July 10, 2018 600-800 PM
Folsom Community Center**

The U.S. Environmental Protection Agency invites you to participate in a workshop describing cleanup activities that will occur in August and September this year at Aerojet Area 40, located east of and adjacent to Prairie City Road, south of Highway 50 and north of White Rock Road.

If we can agree on a date that gives the City comfort, maybe we can get something like this in the mailer.

Let me know your thoughts. Chris
